

MAHVISH SIDDIQUE

Lucknow, Uttar Pradesh, India - 226022 | +91-7706865457 | mahvishsiddiqui74@gmail.com

CAREER OBJECTIVE

Computer Science undergraduate with a strong foundation in Java, Python, SQL, passionate about Software Development and problem solving, eager to apply technical skills to real-world challenges and contribute to innovative solutions.

EDUCATION

B.Tech. - Computer Science & Engineering Babu Banarasi Das University, Lucknow CGPA: 8.17 / 10	2023 - 2027
12th — Bright Way Inter College, Lucknow CBSE Percentage: 76 / 100	2022 - 2023
10th — Bright Way Inter College, Lucknow CBSE Percentage: 80.66 / 100	2020 - 2021

KEY EXPERTISE

- Programming: Java, Python
- Web: HTML, CSS, JavaScript, Node.js
- Database: SQL, MongoDB
- Other: Data Structures and Algorithms, Problem Solving, Generative AI

PROJECTS

Virtual Painter using Hand Tracking

Key Skills: Python, OpenCV, MediaPipe, Computer Vision, Hand Tracking, NumPy, Image Processing, GUI Development

Project Link: <https://github.com/mahvish13/virtualPainter.git>

- Developed a Virtual Painter application using Python, OpenCV, and MediaPipe that enables users to draw on a digital canvas through hand gestures captured by a webcam.
- The system uses real-time hand tracking to detect finger movements and convert them into drawing actions.
- Features include multiple brush colors, adjustable brush sizes, eraser functionality, undo/redo operations, and saving drawings as image files.
- The project demonstrates the practical application of computer vision and gesture recognition for human-computer interaction.

AI Chat Assistant with Tool Calling

Key Skills: Node.js, JavaScript, Groq API, Tavily API, Express.js

Project Link: <https://github.com/mahvish13/invoke.git>

- Developed an AI-powered chat assistant using Node.js, Groq API, and Tavily API.
- Implemented intelligent tool calling, real-time web search, conversation memory, and 24-hour chat history storage.
- The system dynamically decides whether to use external tools or generate responses directly from the language model, enabling accurate and context-aware interactions.
